

## DeClock Mario World Remastered (Release)

Fonte: Retroarch (Snes9x)

Hello everyone and greetings from Brazil. I present to you my remastering of hack: DeClock Mario World. The old DeClock was my first attempt to make a kaizo: light. It was a great experience, but I wanted more and that happened. It took four months to build. I hope you have fun!

This hack features:

- 19 challenging levels;
- Instant Retry;
- No Kaizo blocks. This one is required only in one level;
- Awesome soundtrack;
- Minimal trolls;
- You can save your progress anytime pressing "select" on overworld.

Here's some screenshots:

This hack is dedicated to my good friends: Ahthedark, Viniciuskombat1 and Yuridensetsu.

Huge special thanks to My mom and sister, Anorakun, Akutarex, BR Mario Hacks Comunity, Insanit\_\_, Katun24, Miranha, Noob, RVX, Thirdwall and Yuridensetsu. Thank you guys.
